What is QUAL4T2?

QUAL4T2 program aims to support teachers’ teams in Vocational Education and Training (VET) schools in their use of quality assistance mechanisms.

The project intends to introduce and further implement a bottom-up approach for the design of strategic planning in VET institutions by teams. The development of prototype products mixed with indispensable teacher feedback tends to lead to a further change of quality culture and a set of final quality tools that help teams in further development of their quality mechanisms.

Main objectives

The QUAL4T2 project has three main objectives, it will develop a:

> Quality Guide that will make available quality tools and draft a team plan for teams and teachers in schools

> Good Practice Guide that will gather the best experiences learnt in the four pilots programs

> Training Program where the guides will be put into practice. The organizations will effectively learn how to use them in both, in their class and in the own team!

The project outputs will be supported with 7 multiplier events organized at partners’ national level to introduce the Quality Guide and the Good Practice Guide with the aim of exploring the importance of further professionalization as a team, to get first experience of the quality tools, and getting participants involved in further impact actions towards the project outcomes.

Why QUAL4T2?

Teams in VET education are facing the problem of prioritizing how they spend their work days. For this reason, the project partners plan to contribute directly to the improvement of outcomes of quality systems in Europe’s institutes, by investing in teachers’ professionalization to develop more effectiveness and involvement of teachers/trainers in the quality strategic planning.

The QUAL4T2 project is completely in line with the current European policy targets for 2020 as it aims to improve the investment, performance and efficiency in education and training by a further development of quality assurance mechanisms in VET. Since this will be done as well by professionalization of teachers and trainers in teams, it also addresses the Adult Education target by extending and developing educators’ Competences.

Who can benefit from QUAL4T2?

> Teachers and trainers
> Quality staff members
> Managers in training organizations
